

Juliette LAROCLETTE

Born in 1995, Juliette Larochette is a photographer and video artist. Her practice of still and moving images is guided by her vision of the urban and peri-urban landscape. Juliette Larochette explores our ways of inhabiting space. Through this work of framing and point of view, she tends to highlight the notion of a scene constructed by her eye. This allows her to show the confrontation between the reality of the terrain, the interpretation and the viewpoint that is posed on reality.
